Weights	Flat Rate Envelope	Flat Rate Padded Envelope	Small Flat Rate Box	Medium Flat Rate Box	Large Flat Rate Box
Maximum weight: 70 lbs.	7.40	8.00	7.90	13.75	19.30

****Non Machinable Criteria (letters only)**

- If the aspect ratio (length divided by height) is less than 1.3 or more than 2.5. ex. *square pieces*.
- If it has an exterior surface that is not made of paper.
- If it has clasps, strings, buttons, or similar closure devices.
- If it contains items such as pens, pencils, loose keys or coins that cause the thickness of the mailpiece to be uneven.
- If it is too rigid (does not bend easily when subjected to a transport belt tension of 40 pounds around an 11-inch diameter turn).
- If it is a mailpiece more than 4-1/4 inches high or 6 inches long (letter size) and the thickness is less than 0.009 inch.
- Has a delivery address parallel to the shorter dimension of the mailpiece.
- Is a self-mailer or booklet that is not prepared according to regulations.

Design Tips:

- Keep it letter size!
- Avoid square designs
- Mail must be rectangular! – no rounded corners or die-cut shapes
- Keep the folded edge at the bottom
- Keep return address out of the OCR read area (see USPS template 67)
- Make sure there is no copy in the barcode clear zone
- 9 point stock (.009") for automation discounts
- Leave room for the address block – 2" x 4" preferred
- Avoid dark or bright backgrounds or designs in the address area
- Allow 1/4" clearance on each side for anything inserting to an envelope
- Avoid open end envelopes – they will likely require hand inserting
- Use gummed flapped envelopes for any machine inserting
- Make sure you use the proper indicia for the class of mail you want
- Address block must be on top half of piece when spin is on the right for all classes except first class flats
- Have coating for address panel knocked out for mailing greater than 50k and all envelopes that will be inkjetted
- When possible use windowed envelopes
- ASK! – there are no stupid questions

Data File Specifications

Broudy Printing can work with virtually any type of file but some will require additional formatting.

Preferred:

Comma Delimited (*.csv)

Excel (*.xls or *.xlsx)

Fixed Length

Please NO Label Layouts (Word)
